

# Muhammad Hamza (Hamza Ghafoor)

Full Stack Software Engineer | Cloud-Native & SaaS

Faisalabad, Pakistan | hamza.kamboh035@gmail.com | linkedin.com/in/hamza-ghafoor  
github.com/Mrhamza01 | hamzaghafoor.vercel.app

## Professional Summary

---

Full Stack Software Engineer with production experience since **Nov 2022**. Builds and operates **multi-tenant SaaS** and **on-prem cloud-native** systems end-to-end — features, databases, Kubernetes, CI/CD, observability, and backup/DR.

**200+** client Kubernetes deployments | ERP full-stack delivery | zero-downtime upgrades (hours → minutes) | air-gapped on-prem K8s | React / Next.js / TypeScript / Node.js / PostgreSQL / Docker / Helm

## Technical Skills

---

**Languages:** TypeScript, JavaScript, Go, SQL, HTML, CSS

**Frontend:** React, Next.js, Tailwind CSS, ShadCN, i18n

**Backend:** Node.js, Express, REST APIs, GraphQL, Laravel, queues / background jobs, microservices

**Databases:** PostgreSQL, MongoDB, MySQL; Prisma, Drizzle, Kysely; Redis

**Cloud & DevOps:** Docker, Podman, Kubernetes, Helm, kOps, GitHub Actions, Jenkins, NGINX Ingress, cert-manager, Longhorn, Prometheus, Grafana, AWS (S3, SQS, RDS)

**Platforms:** Vercel, Netlify, Heroku, Firebase, Appwrite, Supabase

**Architecture:** Multi-tenant SaaS, system design, CI/CD, high availability, backup / disaster recovery, air-gapped deployments

## Professional Experience

---

### Full Stack Software Engineer

*MilestoneZero*

**Dec 2025 – Present**

*Pakistan*

- **Air-gapped Kubernetes delivery:** Deployed sustainability / public-safety software to on-prem Kubernetes under enterprise licensing, domain-authenticated databases, and Linux–Windows integration with strict reliability requirements.
- **Courier finance receivables:** Built reconciliation of third-party payment and charge APIs against contracts; anomaly detection; cash-flow and courier analytics for operations.
- **WhatsApp AI order automation:** Chat summary → structured orders; cut a 15–30 minute capture task to seconds; tuned DB/cache and background workers for API latency under load.
- **Queues & async scale:** Designed background jobs, workers, and cache precompute for slow queries so user-facing APIs stay fast under pressure.
- **International client product:** Shipping features on a social / events platform that connects people with shared interests into one engagement product.
- **Hiring:** Conduct technical interviews and screen candidates for engineering roles.

### Full Stack Software Engineer

*AxonERP / Axon (core product; scaled from Multi-Techno)*

**Nov 2022 – Nov 2025**

*Pakistan*

- **Full-stack ERP delivery:** Designed and shipped production features with React, Next.js, TypeScript, Node.js, REST/GraphQL, PostgreSQL, and MongoDB — performance, data integrity, and multi-tenant SaaS scale.
- **Multi-tenant data layer:** Owned tenant isolation, connection-pool tuning, and connection-limit remediation across production fleets.
- **200+ client Kubernetes fleet:** Operated on-prem clusters (kOps); authored Helm charts; deployed apps and databases with PV/PVC storage classes and Longhorn backups.
- **CI/CD automation:** Built GitHub Actions (CI) and Jenkins (CD) with automated migrations, seeding, and zero-downtime upgrades — client release cycles from hours to minutes.
- **Platform reliability:** Ran NGINX Ingress, cert-manager, Prometheus/Grafana, and fleet-wide backup/restore/DR runbooks for cluster and database recovery.

- **Ops & integrations:** Built client-monitoring admin panel; integrated n8n and WhatsApp Business APIs; collaborated with product, design, and QA; participated in code reviews and clean-architecture standards.

## Selected Projects

---

**Multi-Tenant ERP Platform** | React, Node.js, PostgreSQL, Kubernetes, Helm

*AxonERP*

- Production multi-tenant SaaS ERP with tenant isolation, Helm-based client deployments, observability, and DR runbooks across **200+** on-prem environments.

**CI/CD & Container Automation** | GitHub Actions, Jenkins, Helm, Docker

*Multi-Techno / AxonERP*

- Pipelines to build, tag, and push Docker images and promote Helm releases to Kubernetes — eliminated manual builds and cut deployment cycles from hours to minutes.

**WhatsApp Order Summary** | Chrome Extension, AI / LLM

- Chrome extension for WhatsApp Web that summarizes sales chats and posts structured order summaries to accelerate order capture.

**ARCHARCH** | Go CLI

*Sep 2025*

- Folder-structure scaffolding CLI that standardizes and accelerates new project setup with consistent architecture layouts.

**AI Article Summarizer** | GPT-4, NLP

- GPT-4 powered summarizer that extracts key insights and produces concise, high-quality article summaries.

## Education

---

**B.S. Computer Science**  
*Virtual University of Pakistan*

**2020 – 2024**  
*Pakistan*

## Certifications

---

- Back End Development and APIs — freeCodeCamp
- IBM Full Stack Software Developer Specialization — Coursera
