PROFESSIONAL SUMMARY

Senior Full-Stack Software Engineer and DevOps practitioner with 4+ years delivering cloud-native and on-prem production systems—from multi-tenant ERP platforms serving 200+ clients to mission-critical public-sector products. Owns system design, implementation, CI/CD, Kubernetes operations, and reliability (backup/DR, monitoring, zero-downtime releases). Proficient in React, Next.js, TypeScript, Node.js, Go, PostgreSQL, MongoDB, Docker, Kubernetes, Helm, GitHub Actions, and Jenkins. Strong in scalable architectures, monolith-to-microservice migrations, and multi-tenant SaaS. Open to remote senior IC roles.

EDUCATION

Virtual University of Pakistan <i>Bachelor of Science in Computer Science</i>	Pakistan 2020 – 2024
---	-------------------------

EXPERIENCE

Senior Full-Stack Software Engineer <i>MilestoneZero</i>	Dec 2025 – Present Pakistan
- Deliver organization-scale sustainability software with a law enforcement and public safety agency; strict reliability and quality requirements. - Stabilized legacy AI-generated codebase for a public-sector law-enforcement platform; rebuilt backend services, implemented i18n (multi-locale support), streamlined architecture, and delivered production release. - Built enterprise brand-onboarding platform for regional and international clients across wellness, retail, and lifestyle sectors. - Led monolith-to-microservices migration for high load and large data volumes; redesigned service boundaries with the team on scalable system design. - Guided collaborators on delivery practices; leveraged modern tooling (e.g., Cursor) to accelerate safe iteration.	
Senior Full-Stack Software Engineer <i>AxonERP / Axon</i>	May 2021 – Nov 2025 Pakistan
- Designed and shipped full-stack ERP features (React, Next.js, TypeScript, Node.js, REST/GraphQL, PostgreSQL, MongoDB) with focus on performance, data integrity, and scalability. - Owned multi-tenant database system design: tenant isolation, connection-pool tuning, and resolving connection limits at scale. - Deployed on-prem Kubernetes for 200+ clients; authored Helm charts; built CI (GitHub Actions) and CD (Jenkins) with automated migrations and zero-downtime upgrades (hours to minutes). - Operated NGINX Ingress, Longhorn, cert-manager, Prometheus/Grafana, NFS, and nginx proxy; fleet-wide backup, restore, and disaster recovery. - Integrated n8n and WhatsApp Business APIs; built ops admin panel; led code reviews and clean architecture with product, QA, and design.	

PROJECTS

ARCHARCH | Go

Sep 2025

- CLI tool for standardized folder-structure scaffolding to accelerate project setup.

WhatsApp Order Summary | Chrome Extension, AI

- Built a Chrome extension for WhatsApp Web that uses AI to summarize live sales conversations and post structured order summaries in the chat, helping representatives capture customer orders faster.

CI/CD & Container Automation | GitHub Actions, Helm, K8s, Docker

- Production CI/CD with GitHub Actions, Jenkins, Helm, and Kubernetes; automated Docker build/tag/push; cut deployment time from hours to minutes.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Go, SQL

Frontend: React, Next.js, Tailwind CSS, ShadCN, i18n / localization

Backend: Node.js, Express, Laravel, REST APIs, GraphQL

Data: PostgreSQL, MySQL, MongoDB; Prisma, Drizzle, Kysely

DevOps / Platform: Docker, Kubernetes, Helm, GitHub Actions, Jenkins, NGINX Ingress, cert-manager, Longhorn

Observability & Ops: Prometheus, Grafana, backup/DR, NFS

Architecture: System design, microservices, multi-tenant SaaS, high-availability deployments

Cloud & Tools: AWS, Vercel, Netlify, Heroku; Git, n8n, Firebase, Appwrite, Supabase

AI & Integrations: LLM-powered summarization, Chrome extensions, WhatsApp Web

CERTIFICATIONS

Back End Development and APIs
