

Hamza Ghafoor

Senior Software Engineer | Full-Stack, Backend & Platform Systems

Faisalabad, Pakistan | +92 309 7906831 | hamza.kamboh035@gmail.com
linkedin.com/in/hamza-ghafoor | github.com/Mrhamza01 | hamzaghafoor.vercel.app

Professional Summary

Full-Stack Software Engineer with production experience since **Nov 2022**, targeting senior full-stack, backend, and platform roles. Designs, builds, and operates systems end-to-end across SaaS and restricted enterprise environments: product features, APIs, data, asynchronous workers, CI/CD, Kubernetes, observability, and disaster recovery. Core strengths include multi-provider logistics architecture, marketplace payments (Stripe Connect), production AI workflows, and reliable delivery under operational constraints.

Technical Skills

Languages: TypeScript, JavaScript, Go, SQL, HTML, CSS

Frontend & Backend: React, Next.js, Tailwind CSS, ShadCN; Node.js, Express, Laravel, REST, GraphQL

Data & Messaging: PostgreSQL, MongoDB, MySQL, Redis; Prisma, Drizzle, Kysely; BullMQ, Amazon SQS, workers, retries, dead-letter queues

Cloud & DevOps: Docker, Podman, Kubernetes, Helm, kOps, GitHub Actions, Jenkins, NGINX Ingress, cert-manager, Longhorn, Prometheus, Grafana, AWS (S3, SQS, RDS)

Architecture: Multi-tenant SaaS, provider abstraction, async processing, Stripe Connect, CI/CD, backup/DR, on-prem and air-gapped delivery

Professional Experience

Full Stack Software Engineer

MilestoneZero

Dec 2025 – Present

Pakistan

- **Air-gapped enterprise delivery:** Designed, delivered, and deployed a sustainability platform for **Abu Dhabi Police** to on-premises, air-gapped Kubernetes with licensed-software, domain-authenticated database, and Linux-Windows/Kerberos constraints.
- **Multi-courier architecture:** Designed core integration and settlement workflows across **9 courier providers** (including PostEx, Leopards, and M&P), mapping heterogeneous APIs, statuses, identifiers, charges, invoices, returns, and claims into one logistics domain.
- **Asynchronous scale and recovery:** Built BullMQ and Amazon SQS workers for **100K+ designed order capacity** with scheduling, horizontal concurrency, rate-limit controls, retries/backoff, dead-letter queues (DLQs), failure isolation, and correction/reprocessing.
- **Reconciliation and settlement:** Implemented CPR/invoice ingestion, contract-based charge matching, discrepancy analysis, returns and claims, settlement, net receivables, and cash-flow visibility for finance and operations.
- **Marketplace payments:** Owned Stripe Connect infrastructure for ticket payments, host Connected Accounts, fund holding, business-rule-driven delayed transfers/payouts, refunds, and reversals on an international events product.
- **Production AI workflows:** Shipped personalized message generation, booking-agent order summaries, and a WhatsApp/automation order-creation agent with user/address validation, reducing a 15–30 minute task to seconds.
- **Technical ownership:** Conduct hiring and technical interviews while solving production integration and microservice-related challenges.

Professional Experience (continued)

Full Stack Software Engineer

Nov 2022 – Nov 2025

AxonERP / Axon (core product; scaled from Multi-Techno)

Pakistan

- **Full-stack ERP delivery:** Designed and shipped production features and a client-operations admin panel with React, Next.js, TypeScript, Node.js, REST/GraphQL, PostgreSQL, and MongoDB, focusing on performance and data integrity.
- **200+ client Kubernetes deployments:** Designed and operated on-prem clusters with kOps and Helm, including multi-tenant isolation, Dockerized applications/databases, PV/PVC storage, and Redis-backed workloads.
- **CI/CD automation:** Led the move from manual releases to GitHub Actions and Jenkins with image builds, migrations, seeding, and zero-downtime Helm upgrades, reducing deployment cycles from hours to minutes.
- **Reliability and recovery:** Operated NGINX Ingress, cert-manager, Prometheus/Grafana, Longhorn backups, and cluster/database restore practices for stable production delivery.
- **Product collaboration:** Integrated n8n and WhatsApp Business APIs; collaborated with product, design, and QA; contributed to code reviews and clean-architecture standards.

Selected Projects

ARCHARCH / Arch CLI | Go, Clean Architecture

Sep 2025

- Built a Go CLI that scaffolds feature-based Clean Architecture folder structures, standardizing and accelerating project setup across project types.

AI Article Summarizer | GPT-4, React, Vite

- Built a GPT-4-powered article summarizer that extracts key insights and returns concise summaries through a React/Vite interface.

Education

B.S. Computer Science

2020 – 2024

Virtual University of Pakistan

Pakistan

Certifications

- Back End Development and APIs — freeCodeCamp
- IBM Full Stack Software Developer Specialization — Coursera
