Hamza Ghafoor

Full Stack Software Developer | Architecting Scalable SaaS & ERP Platforms, | Kubernetes, DevOps & Cloud-Native Expert | Enhancing Scale, Reliability & Cost Efficiency

Faisalabad, Punjab, Pakistan

Summary

Hi, I'm Muhammad Hamza

Senior Software Engineer & Full Stack Developer

Faisalabad, Pakistan

B.S. Computer Science — Virtual University of Pakistan (2020–2024)

What I Do

I specialize in architecting scalable SaaS & ERP platforms, leveraging:

Cloud-native technologies

Kubernetes

Modern DevOps practices

Full-stack engineering

Infrastructure automation

I bridge the gap between hands-on development and strategic software architecture.

Current Role

Software Development Project Manager & Senior Software Engineer
— AxonERP

I lead:

Product development

Infrastructure reliability

DevOps automation

Developer mentorship

Previously delivered multi-tenant ERP systems and highly automated CI/CD pipelines that significantly improved efficiency and reduced operational costs.

Key Achievements

Architected Axon ERP with automated per-tenant deployments, isolated databases, and disaster-recovery workflows.

Built & managed Kubernetes infrastructure, reducing cloud costs by ~90%.

Delivered multiple SaaS and client applications, including:

LinkTok Social Media App

Laravel + React | Posts, stories, scheduling, auth workflows

AI Interviewer Platform Gemini AI + GraphQL + Next.js | Real-time AI interview simulations

AI Summarizer GPT-4-powered tool for rapid content summarization

Led DevOps & CI/CD initiatives across cloud-native environments.

Mentored junior developers and built a collaborative engineering culture.

Tech Stack & Expertise

Frontend

React • Next.js • TypeScript • ShadCN • TailwindCSS • HTML/CSS

Backend

Node.js • Express • Laravel • REST APIs • GraphQL

Databases / ORMs

PostgreSQL • MySQL • MongoDB Prisma • Drizzle • Kysely

DevOps & Containers

Docker • Podman • Kubernetes • Jenkins Pipelines

Cloud Platforms

AWS • Vercel • Netlify • Heroku

BaaS

Firebase • Appwrite • Supabase

Version Control

Git

My Mission

I'm passionate about building scalable, modular, and cost-efficient software architectures. I excel in fast-paced environments, adopt new technologies quickly, and focus on delivering meaningful, high-impact products.

Let's Connect If You Need
Scalable SaaS or ERP development
Cloud-native deployments & automation
Modern full-stack application architecture
AI-powered web applications

Experience

MilestoneZero

Full Stack Software developer (Mid-Level)

December 2025 - Present (1 month)

Faisalabad, Punjab, Pakistan

Working as a Mid-Level Full Stack Software Engineer, contributing to the development, enhancement, and maintenance of scalable web applications. Actively involved in feature implementation, system optimisation, and collaboration with cross-functional teams to deliver reliable and high-quality software solutions.

Key Responsibilities

Develop and maintain full-stack features using modern JavaScript frameworks and backend technologies.

Implement and consume RESTful APIs, as well as work with both relational and NoSQL databases.

Could you collaborate with product, design, and QA teams to translate requirements into working solutions?

Write clean, maintainable, and testable code following best engineering practices.

Participate in code reviews, debugging, and performance optimisation.

Support deployment workflows and contribute to CI/CD and cloud-native environments.

Continuously learn and adapt to new tools, technologies, and development standards.

AxonERP

Full Stack Software Engineer (Mid-Level)

November 2024 - November 2025 (1 year 1 month)

Faisalabad, Punjab, Pakistan

At AxonERP, I work as a Full Stack Software Engineer with a strong focus on building, scaling, and maintaining cloud-native ERP solutions. My role combines hands-on development with ownership of system reliability and delivery, ensuring stable and performant production environments.

Key Contributions

Designed, developed, and maintained full-stack features using React, Next.js, TypeScript, Node.js, and REST/GraphQL APIs.

Built and optimised backend services with PostgreSQL and MongoDB, focusing on performance, data integrity, and scalability.

Implemented and maintained CI/CD pipelines using GitHub/Jenkins, enabling reliable and repeatable deployments.

Worked extensively with Docker and Kubernetes to manage containerised applications and ensure high availability.

Contributed to infrastructure stability, monitoring, backups, and disaster-recovery practices.

Collaborated closely with product, design, and QA teams to deliver features aligned with business requirements.

Participated in code reviews, ensured clean architecture, and followed best practices for maintainable code.

Multi-Techno integrated Solutions (Pvt.) Ltd.

Junior Full Stack Developer

May 2024 - October 2024 (6 months)

Faisalabad, Punjab, Pakistan

At , I led the to fully / by building and managing the company's complete Kubernetes cluster infrastructure. I designed and implemented scalable, reliable deployment workflows that significantly improved release speed and reduced human error.

- , which successfully .
- Built a for monitoring clients and managing administrative tasks.
- , including database migration, seeding, and deployment processes with zero manual intervention.
- Ensured smooth and reliable database operations within Kubernetes clusters.
- strategies to protect critical data.

My responsibilities also included ensuring robust database operations within Kubernetes, implementing full backup and disaster recovery strategies, and driving continuous improvement in cloud-native infrastructure management.

Independent Software Development

Full-Stack Engineer — Self-Directed Product Development

February 2023 - April 2024 (1 year 3 months)

Over . - hands-on development, - for real clients and personal products. Worked across the full stack—backend, frontend, databases, cloud, and deployments—delivering systems similar to an in-house product engineer.

& :

- , a social media web app using Laravel (backend), MySQL, and a React/Next.js frontend with TailwindCSS and shadcn/ui. Implemented authentication, posts, feeds, profiles, and optimized API workflows.
- using Next.js, React, Prisma, NeonDB, TailwindCSS, and shadcn/ui. Included AI-driven interview sessions, scoring logic, dashboards, and real-time responses.
- Delivered , including dashboards, internal tools, ecommerce features, and small-scale SaaS systems using Laravel, Node.js, Express, Prisma, PostgreSQL, React, and Next.js.

:

Full ownership of backend, frontend, database modeling, and system architecture.

Designed secure, scalable codebases with clean API structures and .

Managed deployments, /, , .

.

Implemented UI/UX with TailwindCSS, shadcn/ui, reusable components, and state management.

This experience reflects real-world engineering delivery, end-to-end ownership, and the ability to build robust modern applications across diverse technologies.

Education

Virtual University of Pakistan (VU)

Bachelor's degree, Computer Science · (October 2021 - October 2024)
